

Stargazing

Backyard astronomers know the importance of dark skies. North Frontenac Park Lands offer stargazers a remarkable view of the starry canopy without the annoying effects of light pollution.

Enjoy your favourite spring, summer or fall constellation from a quiet, secluded campsite providing the ideal setting for hours of dark sky enjoyment. Amateur astronomers appreciate our top 10 dark sky rating, especially when observing deep sky objects like nebulas and faint galaxies in the deeper regions of space.

To help you choose the best nights to book your campsite, here are a few links, compliments of Environment Canada, where you can get 48 hour forecasts for cloud cover, seeing quality, and sky transparency.
